Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang et al.

Chang et al. teaches chemical mechanical polishing equipment comprising a turntable, 30, a polishing pad, 28, disposed atop of the turntable, a slurry supply unit, 48, that dispenses slurry onto an upper surface of the polishing pad, (col. 2, lines 27-29), a head polishing unit having a polishing head, 26, positionable over the upper surface of the polishing pad, the polishing head being rotatable to rotate a wafer atop the polishing pad, (col. 1, line 64-col. 2, line 3), a conditioning unit having a pad conditioning head, 34, that conditions the polishing pad when in contact with the pad, (col. 2, lines 8-11), and a cleaning solution supply unit through which a cleaning solution is supplied, the cleaning solution supply unit having at least one spray nozzle, 66, being disposed at an end of the cleaning solution supply line and a flow regulator disposed in-line with the supply line, (col. 8, lines 55-60), and the nozzle being oriented to spray the cleaning solution over a region encompassing the upper surface of the polishing pad, (col. 7, lines 37-41). Chang et al. also teaches that the region also encompasses at least one of the polishing head and the pad conditioning head, (col. 6, lines 47-57).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirokawa et al. was cited to show another example of a polishing device.
